

Beech Class - Spring 2
Home Learning Challenges

**Which plants would Superworm find in
Horwich?**

Here are some ideas for this term's learning challenge!
The challenge is to be completed over this term and should be
brought into school anytime before:

Monday 30th March 2026.

I have been very impressed by the challenges that have been
created so far and look forward to seeing more!

Any questions please come and see me,
Miss Miller.

Task One	Use the internet or an information book about plants to research the names of unfamiliar plants that you see and write about them or draw and label them. Or use paint or a similar programme to create a garden picture?
Task Two	Create a 3D garden in a box. Think about the materials you could use and the types of plants and flowers that you would like in your garden.
Task Three	Look out for different types of plants and flowers when you're out and about, you could take photographs and keep a list of the plants and flowers you have seen.
Task Four	Plant seeds in a clear plastic cup and keep a diary of how the seed changes and grows into a plant.
