

## Hazel Class Spring 2 Learning Challenge

### Plants

## How do seeds and bulbs grow into healthy plants?

### As scientists, could you...

- conduct your own experiment to investigate in what conditions plants grow best?
- grow your own fruits/ vegetables and keep a diary of your observations?

### As writers, could you...

- write a set of instructions on how to plant a seed?
- write an acrostic poem using the word 'PLANT' or 'FLOWER'?
- Pretend you are a tiny seed and write a diary entry about your day as you begin to grow? Describe how you feel, what you see and what is happening underground.
- Create a fact file about a chosen plant?

### As artists and designers, could you...

- use leaves, sticks and other natural materials to create a plant/ flower shape?
- create a plant collage using different materials?
- using a real plant as your focus, create a sketch using your chosen media?
- Using a tablet or phone (with help from an adult) take photographs of plants from different angles?

A huge well done to all the children who completed Learning Challenges last half term! They were truly amazing and the children ought to be very proud of their achievements. Here are some ideas for this half term's home learning. Let's see if everybody can complete at least one challenge. You are, of course, welcome to do more than one! Please feel free to complete any other home learning your child is inspired to do linked to our topic, even if it is not on this challenge sheet. Challenges are to be completed over the half term and should be brought into school by **Monday 30<sup>th</sup> March**

I look forward to seeing your completed challenges.  
Please do not hesitate to ask should you have any questions regarding home learning.  
Thank you in advance for all your support.  
Mrs Evans
