

Hazel Class Spring 1 Learning Challenge How did we learn to fly?

As writers, could you...

- write a diary entry from a day in the life of Amelia Earhart?
- create your own alien and describe it using interesting adjectives?
- write a poem related to flight?
- write a set of instructions on how to make a paper aeroplane?

As artists and designers, could you...

- design and create your own vehicle which could be used to travel into space?
- design your own space suit? If you're feeling especially adventurous, you could use materials you find at home to help you create it too!
- design, build and decorate your own kite?

As scientists, could you...

- look at the moon over a number of nights, observe and record any changes you notice?
- Explore how the planets and sun move and think of a way to portray this to the class? You may choose to use people at home to help with this and video them or you may want to create a moving model.

Here are some ideas for this half term's home learning. Let's see if everybody can complete at least one challenge. You are, of course, welcome to do more than one! Please feel free to complete any other home learning your child is inspired to do linked to our topic, even if it is not on this challenge sheet. Challenges are to be completed over the half term and should be brought into school by **Monday 9th February.**

I look forward to seeing your completed challenges.
Please do not hesitate to ask should you have any questions regarding home learning.
Thank you in advance for all your support.
Mrs Evans
